

Table of Contents

List of Exhibits.....	iv
------------------------------	-----------

List of Acronyms	v
-------------------------------	----------

Chapter One: Introduction.....	1-1
---------------------------------------	------------

1 When did planning for the Proposed Project begin?	1-1
2 What is contained in the SR 518 Route Development Plan?	1-2
3 What is the Proposed Project?.....	1-2
4 Who are WSDOT's partners for the Proposed Project?	1-3
5 What projects comprise the regional transportation network?.....	1-3
6 How has the public been involved with the Proposed Project?	1-3
7 What is project scoping?	1-4
8 Why is WSDOT preparing this Environmental Assessment?	1-6
9 What are the next steps in this environmental process?	1-6
10 Who will decide if the Proposed Project should move forward?	1-7
11 What information is contained in this environmental document?	1-7

Chapter Two: Purpose and Need	2-1
--	------------

1 Where is the Proposed Project located?	2-1
2 Why is SR 518 an important regional transportation link?.....	2-1
3 What is the purpose of the Proposed Project?.....	2-2
4 Why do we need additional capacity between the North Airport Expressway/SR 99 interchange and the I-5/I-405 interchange?	2-3
5 What happens if the Proposed Project is not built?.....	2-4

Chapter Three: Project Alternatives 3-1

- 1 What are the project alternatives? 3-1
- 2 What benefits will the Proposed Project provide? 3-2
- 3 What if the Proposed Project is not built? 3-3
- 4 What are the principal features of the Proposed Project? 3-4
- 5 How will stormwater from the Proposed Project be managed? 3-10
- 6 How will the Proposed Project be constructed? 3-11
- 7 What is the Proposed Project's construction schedule? 3-13

Chapter Four: The Environment: What's There Now, Potential Effects, and Mitigation 4-1

- 1 How does an environmental assessment analyze community and environmental features? 4-3
- 2 What environmental and community disciplines were analyzed for this Proposed Project? 4-3
- 3 Are all of these disciplines discussed in this document? 4-3
- 4 Noise 4-4
- 5 Geology and Soils 4-10
- 6 Transportation 4-15
- 7 Water Resources 4-24
- 8 Wetlands 4-33
- 9 Wildlife and Vegetation 4-42

Chapter Five: Cumulative Effects 5-1

- 1 What are cumulative effects and why do we study them? 5-2
- 2 If identified, how will adverse cumulative effects associated with the Proposed Project be mitigated? 5-3
- 3 What are the geographic boundaries for this analysis? 5-3
- 4 What projects were considered for this cumulative effects analysis? 5-4
- 5 What cumulative impacts would result from the Proposed Project? 5-7
- 6 What measures are proposed to minimize cumulative effects? 5-12

Appendices

A: Agency Coordination.....	A-1
B: List of Preparers	B-1
C: Glossary	C-1
D: References	D-1
E: Air Quality	
F: Energy	
G: Hazardous Materials	
H: Cultural Resources	
I: Land Use	
J: Noise	
K: Social and Economic Elements	
L: Transportation	
M: Visual Quality	
N: Geology and Soils	
O: Ecosystems	
P: Water Resources	
Q: Environmental Assessment Commitments	Q-1

Appendices E through P are located on the CD contained in this document and are available on the project website (www.wsdot.wa.gov/projects/SR518/).

List of Exhibits

1-1	Projects within the Regional Transportation Network	1-3
2-1	SR 518 General Project Vicinity	2-2
3-1	Project Study Area	3-2
3-2	Typical Cross-Section of the Proposed Project	3-4
3-3	Proposed Project Roadway Features (Sheet 1)	3-5
3-3	Proposed Project Roadway Features (Sheet 2)	3-6
3-4	General Comparison of the No-Build Alternative and Proposed Project	3-8
4-1	Environmental and Community Disciplines	4-3
4-2	Location and Characteristics of Noise Barriers	4-7
4-3	Comparison of Noise Levels at Each Noise Barrier Location	4-8
4-4	Types of Geologic Hazards	4-11
4-5	Geologic Hazards in the Project Study Area	4-12
4-6	Eastbound Speeds, Level of Service, and Travel Times, 2030 No-Build: AM Peak	4-19
4-7	Eastbound Speeds, Level of Service, and Travel Times, 2030 Proposed Project: AM Peak	4-19
4-8	Eastbound Speeds, Level of Service, and Travel Times, 2030 No-Build: PM Peak	4-22
4-9	Eastbound Speeds, Level of Service, and Travel Times, 2030 Proposed Project: PM Peak	4-22
4-10	Gilliam Creek within the Project Study Area	4-26
4-11	Altered Impervious and Pervious Surfaces Resulting from the Proposed Project	4-30
4-12	Wetlands and Streams in the Project Area (Sheet 1)	4-34
4-12	Wetlands and Streams in the Project Area (Sheet 2)	4-35
4-12	Wetlands and Streams in the Project Area (Sheet 3)	4-36
5-1	Projects Considered in the Cumulative Effects Analysis	5-7
5-2	General Location of Gilliam Creek	5-9
